Goals

The Board recognizes the importance the physical plant plays in enhancing the instructional program. The Board shall develop a program to maintain and/or upgrade the buildings and grounds of the Charter School. Facilities represent a long-term investment of the School. The functional utility of such facilities can be increased with a regular maintenance program monitored by staff.

The Board further recognizes the importance of planning in order to provide the anticipated facility needs of the future. The School will review demographic factors as changes make such reviews necessary.

#### Acquisition, Use, and Disposal of School Property

##### Acquisition of Property

**Real Property:** Within one year prior to acquiring or disposing of real property, the Charter School will cause such property to be appraised by an appraiser certified in the State of Idaho. The appraised value will be used to establish the fair market value of the property. The appraisal shall be exempt from disclosure to the public. If the Board is purchasing a site for educational purposes, such building site must be located within the boundaries of the city limits, unless, by resolution of the Board, it is determined that it would be in the best interest of the Charter School to acquire a site outside city limits, but within the boundaries of the School's attendance area.

**Personal Property:** The Charter School may purchase personal property as deemed necessary for the effective operation of the School by any means deemed appropriate when the expenditure of funds will be less than \$50,000. When the purchase of personal property (with the exception of curricular materials) is reasonably expected to cost \$50,000 or more, the School shall comply with the statutory bidding requirements found in Chapter 28, Title 67 of the Idaho Code.

##### Conveyance of Property

**Less than \$500:** For property that has an estimated value of less than \$500, the property may be disposed of in the most cost-effective and expedient manner by an employee empowered by the Charter School to do so. However, the employee shall notify the Board in writing of the item(s) to be disposed of and the manner in which they will be disposed prior to disposal of the property.

**Less than \$1,000:** For property that has an estimated value of less than \$1,000, the Board may dispose of such property by sealed bid or by public auction. However, prior to disposal of the same at least one published advertisement is required.

**\$1,000 or Greater:** For property with a value of \$1,000 or greater, such property will be appraised. The Board may dispose of such property by sealed bids or by public auction to the highest bidder. Notice of the time and method of sale shall be published twice in accordance with I.C. § 33-402(g). Proof of posting as required in I.C. 33-402(h) must be acquired before the sale. Such property may be sold for cash or upon such terms and conditions as the Board determines, however, the term of the contract may not to exceed ten years and must bear an annual interest rate of not less than seven percent interest. Title to property sold on contract shall remain in the Charter School until full payment is received.

**Equipment Acquired Under a Federal Award:** When it is determined that original or replacement equipment, as defined in Policy 7270, acquired under a federal award is no longer needed for the original project or program or for other activities currently or previously supported by a federal awarding agency, the Administrator, his or her designee, or the Business

Manager will contact the awarding agency (or pass-through for a state-administered grant) for disposition instructions.

Generally, disposition of equipment is dependent on its fair market value (FMV) at the time of disposition. If the item has a current FMV of \$5,000 or less, it may be retained, sold, or otherwise disposed of with no further obligation to the federal awarding agency. If the item has a current FMV of more than \$5,000, the federal awarding agency is entitled to the federal share of the current market value or sales proceeds.

If acquiring replacement equipment, the Charter School may use the equipment to be replaced as a trade-in or sell the property and use the proceeds to offset the cost of the replacement property.

The School will use whatever means available to ensure the highest possible return on any items sold.

According to 2 CFR §200.439 (2), Capital expenditures for special purpose equipment are allowable as direct costs, provided that items with a unit cost of \$5,000 or more have the prior written approval of the Federal awarding agency or pass-through entity. Therefore, the Charter School should request prior approval from the State Department of Education for the purchase or the disposition of equipment with value of \$5,000 or more.

#### Donated Property

If property is donated to the Charter School, the Board may sell the property without advertising or bidding within one year of the time the initial appraisal was conducted.

#### Exchange of Property

The Board may exchange real or personal property for other property provided that:

1. Such property is appraised;
2. 1/2 plus one of the members of the full Board determine such conveyance or exchange is in the best interest of the Charter School; and
3. A resolution is passed authorizing such exchange of real and/or personal property to any of the following:
  - A. U.S. government;
  - B. City;
  - C. County;
  - D. State of Idaho;
  - E. Hospital district;
  - F. School district;
  - G. Public charter school;
  - H. Idaho Housing and Finance Association;
  - I. Library district;
  - J. Community college district;

- K. Junior college district; or
- L. Recreation district.

Operation and Maintenance of Charter School Facilities

The Charter School seeks to maintain and operate facilities in a safe and healthful condition. The facilities manager, in cooperation with the Administrator or designee, fire chief, and county sanitarian, shall periodically inspect plants and facilities. He or she shall provide for a program to maintain the School physical plant by way of a continuous program of repair, maintenance, and reconditioning. Budget recommendations shall be made each year to meet these needs and any such needs arising from an emergency.

The facilities manager shall formulate and implement energy conservation measures. The Administrator and staff are encouraged to exercise other cost-saving procedures in order to conserve the resources of the School.

Safety Program

The Board acknowledges the importance of safety for students, staff, and others having business with the Charter School. In addition, programs that advocate safety education, accident prevention, proper supervision, and OSHA Regulations are important protective measures and are also a means to promote a culture of safety awareness. The Board directs the Administrator or designee to form a Safety Committee to research and assess available programs and make recommendations to the Board for the implementation of these programs.

The Board also directs the Safety Committee to develop an Exposure Control Plan to eliminate or minimize work-related exposure to bloodborne pathogens, particularly Human Immunodeficiency Virus (HIV) and Hepatitis B Virus.

Security

Security means not only maintenance of buildings, but also protection from fire hazards and faulty equipment and safe practices in the use of electrical, plumbing, and heating equipment. The Board requires close cooperation with local police, fire, and sheriff departments and with insurance company inspectors to do safety programs and training to ensure employees are using safe practices.

Access to School buildings and grounds outside of regular school hours shall be limited to staff whose work requires access. An adequate key control system shall be established which shall limit access to buildings to authorized staff and shall safeguard against the potential entry of unauthorized persons.

Records and funds shall be kept in a safe place and under lock and key when required.

Locks and other protective devices designed to be used as safeguards against illegal entry and vandalism shall be installed when appropriate to the individual situation. Employment of security guards may be approved in situations where special risks are involved. All incidents of vandalism and burglary shall be reported to the Administrator or designee immediately and to law enforcement agencies as appropriate.

Facilities Operations

The operation of the Charter School's facilities shall be the responsibility of the Administrator through the facilities manager. The facilities manager shall manage the operation of the facilities through the School custodians.

An adequate staff of custodial personnel will be employed by the Charter School to operate the School's facilities. This responsibility shall include, but not necessarily be limited to, the following:

1. Adequate and timely operation of each facility's heating system;
2. Proper care of the Charter School's physical properties, including walls, floors, roofs, ceilings, and equipment in those facilities;
3. Adequate care of and timely lamp replacement in each facility's lighting system; and
4. Proper care of each facility's grounds and playgrounds.

Because of the nature of facility operations, this service shall be provided not only during the normal scheduled working day and working year, but shall also occur during those times when the building is occupied outside of regular hours.

Waste Management and Recycling

The practice of discarding materials used in Charter School facilities is wasteful of natural resources, energy, and money. The Board, in an effort to set an example of stewardship of our natural resources and to develop responsible citizenship in our students, declares that resource conservation is to be made an integral part of the physical operation of the school system and of the school curriculum. Therefore, it shall be the policy of the School that:

1. The Charter School will integrate the concept of resource conservation, including waste reduction and recycling, into the environmental education curriculum at all levels.
2. The amount of waste of consumable materials is to be decreased by:
  - A. Reduction of the consumption of consumable materials wherever possible;
  - B. Full utilization of all materials prior to disposal; and
  - C. Minimization of the use of non-biodegradable products wherever possible.
3. The School will cooperate with, and participate in, recycling efforts being made by the local and State governments. As systems for the recovery of waste and recycling are developed, the School will participate by appropriately separating and allowing recovery of recyclable waste products.
4. The School will purchase, where financially viable, recycled products and will also encourage suppliers, both private and public, to make recyclable products and unbleached paper products available for purchase by public schools.
5. Representatives of the School will actively advocate, where appropriate, for resource conservation practices to be adopted at local, regional, and State levels.

#### Asbestos Program

It is the intent of the Charter School that the Asbestos Hazard Emergency Response Act (AHERA) and all of its amendments, alterations, and changes be complied with by all School employees, vendors, and contractors.

The Charter School shall develop and continually update an asbestos management plan for the School, including all buildings that they lease, own, or otherwise use as School buildings, and submit the plan to the Idaho Department of Environmental Quality for approval. A copy of the Charter School's plan shall also be kept at the School and made available to the public for review. The School shall notify parents, teachers, employees, and employee organizations (in writing) of the availability of management plans. The management plan shall include a description of the steps taken to notify such groups and a dated copy of the notification.

After an initial inspection of the Schools to identify possible asbestos-containing building materials, the School shall conduct an inspection every three years to determine whether the condition of known or assumed asbestos-containing building materials has changed and will make recommendations on managing or removing the materials. These inspections and any response actions must be performed by trained, licensed professionals. Every six months, the School will survey the condition of these materials to assure that they remain in good condition. Forms for noting the condition of these materials shall be included in the management plan.

The School will train all maintenance and custodial staff on asbestos and how to deal with it, and notify short-term or temporary workers on the locations of the asbestos-containing building materials. Such training will be conducted within 60 days of hire. Warning labels will be posted in routine maintenance areas where asbestos was previously identified or assumed. The School will ensure that plans and procedures to minimize the disturbance of asbestos-containing building materials are set and followed.

The Administrator or his or her designee shall be trained and designated as the person responsible for ensuring that these requirements are implemented.

Hazard Mitigation – Chemistry Lab Disposal

The Board of Directors shall strive to ensure the safety of Charter School students and staff. All students and staff shall practice proper and safe disposal of toxic hazards. Toxic hazards exist in substances used in the School such as in laboratories, science classrooms, and kitchens; in the cleaning of School buildings, buses, and equipment; and the maintenance of School grounds.

This policy primarily focuses on chemistry lab waste disposal. Teachers should instruct students, ensure that no experiment will be dangerous if safe procedures are followed throughout, and ensure that proper precautions are taken to avoid contaminating the environment.

Chemical Waste

All laboratory work with chemicals eventually produces chemical waste. Staff and students associated with the science laboratory share responsibility to minimize the amount of waste produced and to dispose of chemical waste in a way that has the least impact on the environment. Depending upon what is contained in the waste, some waste must be professionally incinerated or deposited in designated landfills, while other waste can be neutralized or discharged.

Waste Storage Prior to Disposal

All waste should be stored in properly labeled containers. The label should contain the date, type of waste, and any other pertinent information required by the disposal company. Waste should be segregated to avoid unwanted reactions and to allow for cost-effective disposal. Waste should be stored in closed containers except when additional waste is being added. The School science department should maintain a central, secure waste storage area.

Disposing of Waste

Teachers should be aware of the appropriate method of disposal for any chemical used in the School laboratory. Teachers should make disposal options a part of all laboratory instructions for students. For chemical waste produced, teachers should instruct students as to the appropriate method of disposal, including disposing of the substance in a disposal container or down the drain.

### Naming of School Facilities

The \_\_\_\_\_ Charter School Board of Directors is responsible for the naming and renaming of Schools and School facilities. It is the desire of the Board that each new Charter School building or facility is given a name that lends it dignity and status. In fulfilling this responsibility, the Board will make every effort to respect community preferences.

The naming or renaming of the School or facility may occur under the following circumstances:

1. When a new facility is built;
2. When two or more facilities have the same name, one may be renamed while the other retains the original name; and
3. When a new facility is built to replace an existing facility which will be closed.

The following guidelines should be considered when naming a facility:

1. A proposed facility name may be a person, place, or thing;
2. Proposed names should not be a person whose primary identification is of a religious nature;
3. Distinguished persons proposed for the facility name must have been deceased for at least six months and should have made significant contributions to the community, county, state, or nation;
4. A person's moral character should also be considered;
5. Persons proposed for the facility name shall not be a relative of any employee or School Board Member; and
6. Geographic names may also be considered. These names should be clearly identifying and widely known.

#### Naming of School Facilities

The Peace Valley Charter School Board Directors is responsible for the naming and renaming of the Schools and all School facilities. It is the desire of the Board that each new Charter School building or facility is given a name that lends dignity and status to the School and facility. In fulfilling this responsibility, the Board will make every effort to respect community preferences.

The naming or renaming of the School or a facility may occur under the following circumstances:

1. When a new facility is built;
2. When two or more facilities have the same name, one facility may be renamed while the other retains the original name; and
3. When a new facility is built to replace an existing facility which will be closed.

The following guidelines should be considered when naming the School or a facility:

1. A proposed facility name may be a person, place, or thing;
2. Proposed names should not be a person whose primary identification is of a religious nature;
3. Distinguished persons proposed for the facility name must have been deceased for at least six months and should have made significant contributions to the community, county, state, or nation;
4. A person's moral character should also be considered;
5. Persons proposed for the facility name shall not be a relative of any employee or School Board Member; and
6. Geographic names may also be considered. These names should be clearly identifying, widely known and recognized.

#### Committee for Naming of Schools and/or Facilities

The Administrator or designee will convene a committee for the naming of the schools and/or facilities. The committee will consist of:

1. Two students;
2. Two teachers;
3. Two parents; and
4. The Administrator or designee.

The committee will work together and form a list of suggested names. The committee will then present the list to the Board of Directors for final decision.

**SCHOOL FACILITIES**

**9805A1 (Permanent Physical Memorials Not Allowed)**

Memorials on School Grounds Not Allowed

The Board of Directors recognizes that the death of a student or member of the staff is deeply felt by the Charter School. As places designed primarily to support learning, School property should not serve as the main venue for permanent memorials for students or staff. Therefore, no permanent memorials or memorial displays of any kind will be erected, planted, placed, or installed on School property.

Permanent memorials for deceased students or staff shall be limited in form to perpetual awards or scholarships.

Policy History:

Adopted on:

Revised on:

Reviewed on:

Memorials on School Grounds

From time to time there may be a desire to honor a deceased student or employee of the Charter School. Any individual or group considering honoring a deceased member of the School community shall place their request in writing and submit their request to the Board. The Board or its designee will contact the family of the deceased to discuss such memorial arrangements. The Board may allow memorials to take place on a case-by-case basis and may not grant authorization to every request.

In considering requests for permanent memorials, the Board will take into account the recommendations of the Administrator or designee regarding the cost to the Charter School for future maintenance and upkeep of the memorial that might accrue to the School.

In the event the Board approves a memorial to be placed on School grounds, it is strongly recommended that such memorials be in the form of a living memorial, such as a tree. This living memorial may be marked with a permanent stone and plaque of modest size indicating the name and relevant information of the person to be memorialized. Other types of memorials may be considered for approval by the Board using the same process indicated above. Any type of memorial, including wording on a plaque, as well as any memorial service on School property, must be approved by the Board or its designee.

Any memorial, permanent or temporary, such as a tree or plaque may be removed, transplanted, taken down, or discarded by the Charter School in the event the School is experiencing demolition, modifications, if the tree has died, or for any other reason that the Board determines that the memorial should be removed or moved. Individuals wishing to place a memorial of any kind must realize that the memorial may not be a permanent fixture on School property and the Charter School has no responsibility to move the same.

In lieu of a physical memorial, the Board suggests that a permanent memorial for the deceased student or staff be limited in form to perpetual awards or scholarships. Contributions to a general scholarship fund established by the Charter School may be made. Memorial scholarships may be accepted and awarded under criteria approved by the School in honor of persons who have special significance to the students, School, or community. Items received become the property of the School and will be used for the purpose for which they were donated.

The Board recognizes that memorials of flowers, personal messages, and mementoes are often created at lockers, parking spaces, and other areas on Charter School property upon such losses or events. The display of all remembrances will be temporary in nature, and will be removed in a timely manner and offered to the family.

Requests may be made to the Board to memorialize an individual or event in School yearbooks, at graduation ceremonies and other Charter School activities. Activities will not detract from

scheduled classroom or School activities. The celebration of student accomplishments may, with prior Board or designee approval, be authorized.
